

Lindel R. Jackson – Manager Project Engineering

Mr. Jackson has thirty-two years of natural gas utility experience. He graduated from Columbus State Community College with an AAS in Mechanical Engineering. He began working for Columbia Gas Transmission in 1976 in compressor operations at the Crawford Compressor station in Sugar Grove Ohio. He has held positions on the technical support staffs at the division and region level specializing in pipeline, measurement, regulation and odorization design, operation and maintenance. His management experience includes six years of supervision in field operations and three years as Superintendent of Measurement and Regulation Operations for the Ohio operations. Mr. Jackson left Columbia in 2004 to assume the position of Service and Safety Director for the City of Lancaster, Ohio. In that position he was responsible for the direction of all city operations including a 14,000 customer municipal gas system. After three years in public service he made the decision to return to the gas industry and has been Manager of Project Engineering for UTI for almost two years.
